

SARCOIDOSIS:
You have questions,
we have answers.

www.stopsarcoidosis.org

People affected by sarcoidosis often have more questions than answers about the disease. FSR is here to help with programs and resources that provide much-needed answers and support for those impacted by sarcoidosis.

Educational Opportunities

FSR offers numerous events online and in-person for patients and loved ones to learn from leading sarcoidosis experts. Check our event calendar for upcoming webinars and education conferences.

Physician Finder

Discover knowledgeable healthcare providers in your area via our online directory with over 2,300 physicians of various specialties, or ask us about finding an approved sarcoidosis care center.

Support Community

Make meaningful connections and build your sarcoidosis support network by connecting with other sarcoid warriors via our Support Group Directory, online Stop Sarcoidosis community, or your local FSR Patient Ambassador.

Treatment Guidelines

Our Sarcoidosis Treatment Guide - developed by expert physicians - details the commonly prescribed medications for sarcoidosis, as well as off-label alternatives. Share this with your provider to make informed treatment decisions together.

Research Opportunities

Clinical trials are critical to finding new and better treatments for sarcoidosis. To improve patient care and advance sarcoidosis research, FSR connects interested patients with research opportunities including our own FSR Patient Registry.
