Union Station

Washington, DC

About Sarcoidosis

Sarcoidosis (pronounced SAR-COY-DOE-SIS) is an inflammatory disease characterized by the formation of granulomas—tiny clumps of inflammatory cells—in one or more organs of the body. Sarcoidosis remains difficult to diagnose with limited treatment options and no known cure.

About This Event

FSR's Inaugural Sarcoidosis Awards Gala brings together members of the sarcoidosis community to celebrate clinicians, researchers, and advocates from around the globe leading the charge to advance sarcoidosis research and carve the path towards better treatments and a cure.

About FSR

The Foundation for Sarcoidosis Research (FSR) is the leading international organization dedicated to finding a cure for sarcoidosis and improving care for sarcoidosis patients through research, education, and support. Since its establishment in 2000, FSR has fostered over \$6 million in sarcoidosis-specific research efforts.
