

March 17, 2023

Dear Senator/Representative:

The following undersigned organizations representing the public health, medical and patient advocacy communities, write to you to state our strong opposition to **S.184 and H.R. 277 - the Regulations from the Executive in Need of Scrutiny Act of 2023 (REINS Act)**, and we ask you to oppose this harmful legislation.

The REINS Act is a threat to public health. It would add major roadblocks to health-protective regulations by requiring Congress to approve all "major" rules issued by federal agencies within a 70-day window. This includes public health rules from the Centers for Medicare and Medicaid Services, the Environmental Protection Agency and the Food and Drug Administration, among other federal agencies that protect the health and safety of American citizens. Under the REINS Act, the default would be

Congress blocking important and critical protections including clean air, public health, safety and healthcare measures that have already been authorized by current law.

The REINS act would unilaterally weaken the implementation of public health and safety safeguards that require the promulgation of significant rules that benefit millions of Americans. These include rules that are statutorily required to prevent deaths, illness and injury and to protect the public health. Additionally, the REINS Act would give Congress the power to prevent a "major" rule from being effectively implemented simply by taking no action. This step delays safeguards and means that agencies would not only have to reckon with a significantly longer time frame to pass any meaningful rules, but also that the health and safety of the public would remain in limbo and under threat. As we've tragically witnessed in East Palestine, Ohio, federal rules are imperative to ensuring the health and safety of the public.

The REINS Act would also hinder the ability of federal agencies to act and respond to threats swiftly and effectively. While there are some exceptions that allow a rule to be implemented for one 90-day period without Congressional approval – it is not enough.

The REINS Act is a threat to our nation's health. We urge you to oppose the REINS Act and other similar legislation.

Sincerely,
